WHAT AND HOW...

We have prepared several games that use the **LETTER BINGO** game template. All the games can be found on our platform 8doodles.com.

The first game is a combination of the **LETTER GENERATOR** and the **LETTER BINGO** template. The rule is very simple. You draw letters generated by the generator and cross them out on the template. The player who crosses out all the letters in any square wins. However, each player must use the same template.

The second game is a combination of the game **LETTER-SO** and the **LETTER BINGO** template. Players move on the board, rolling dice to collect individual letters, which, as in the first game, they cross out on the template. The player who crosses out all the letters in all squares first wins.

The third game is a combination of the game **WORDS** and the **LETTER BINGO** template. Players move on the board to collect individual letters, which, as in the second game, they cross out on the template. This time, the player who crosses out all the letters in one of the available six squares first wins.

These are just some of the game proposals using the **LETTER BINGO** template.

*Play games using the template regularly, and over time, you will notice that you can make decisions during games faster and faster. Oh, one more important thing, Max is the guardian of the **LETTER BINGO** template and is happy to advise you on how to use it.*

NOTE

In each rectangle, you'll find numbers placed within circles. If you mark a letter in the row or column where a number is located, you can cross out the chosen letter as many times as indicated by the number in the circle. You can cross out any letter in any chosen rectangle
